

Camp Invention will be hosted at Lincoln Elementary June 6-10, 2016 for kids that will be entering 1st-6th grades next school year.

Camp Invention

Where big ideas
become the next
big thing.

Since 1990, Camp Invention has taken summer fun and transformed it from ordinary to extraordinary! Local educators lead a week of hands-on activities created especially for 1st-6th graders. Boys and girls will spend their time constructing and personalizing a DIY solar-powered cricket with a unique habitat and taking apart electronics to assemble something new. Lessons explore connections between science, technology, engineering and innovation. Early registration discounts are available. Visit www.campinvention.org or email Janet Conrad at jconrad@washington.k12.ia.us for more information. Space may be limited so sign up soon!
